

Open Science Monitoring Initiative

OSMI goals

- 1 Promote the Principles of Open Science Monitoring
- 2 Provide recommendations for technical specifications to implement the Principles
- 3 Support stakeholders in monitoring Open Science

Read the Principles of Open Science Monitoring

OSMI is

- ➔ Enacting UNESCO's Recommendation on Open Science
- ➔ Coordinating Open Science monitoring efforts
- ➔ Fostering equity and inclusion

Members include nearly 200 international experts from six continents. They represent universities, research associations, networks, institutions, libraries, governments, national science bodies and funders, open science organisations, publishers, and technology policymakers.

Members participate actively in working groups and plenary meetings. Together, they help connect with related initiatives to further Open Science monitoring.

Initiated by the French Ministry of Higher Education and Research, Université de Lorraine, UNESCO, Inria, SPARC Europe, PLOS and the Berlin Institute of Health at Charité
